- Project Management and Service Management
- Robotic Process Automation, Artificial Intelligence
- CyberSecurity (Network Security, Risk & Compliance, Data Protection)

## Selected Experience

### RPA Delivery Lead, Central and Eastern Europe (2015 - present)

Overall responsibility for delivery of a RPA deployment, including initiation, architecture and security aspects and discussions with client IT and Security Teams, managing the project including working closely with client PM and client business representatives. Participation in RFP responses and solution architecture.

### Technical and Service Management Transition Lead, Major UK Utility Company (2016)

Responsible for transition of IT operations from incumbent supplier. Leading discussions with the client and negotiations over new SLA's. Responsible for IT environment setup and architecture setup for the whole delivery alliance (included 4 other partner companies). This included technical architecture of the solution and programme/transition management to deliver this solution. Including budgeting and work across various team including external suppliers.

### Global Information Security Lead, Tier One Global Bank (2010 – 2015)

Overall responsibility for information security on a complex IT Transformation global deal. Responsible end to end for risk & compliance service delivered alongside a 2 year IT transformation programme. These services included risk management, various types of security audits as well as design and maintenance of internal security controls for IT service delivered to the client.

### Network Security Team Leader and Security Project Lead (2007 – 2010)

Global Lead of a project focused on IT infrastructure security - build a project plan, staffed the team, trained the team, created project workflows and process documentation and then executed the project and managed the project throughout it's life lifecycle. Managing 30 India based direct reportees and another 20 resources part of a wider team.
